WORK EXPERIENCE

Junior Frontend Developer

Startup company   **2024 - Present**

- Contribute to the development of internal financial software tools, enhancing usability and efficiency.
- Build and refine reusable UI components with React and TypeScript, ensuring maintainable and scalable code.
- Develop responsive HTML/CSS templates for system interfaces, improving cross-device compatibility.
- Create dynamic SendGrid email templates using HTML/CSS to support marketing and transactional workflows.
- Migrate state management from Context API to Redux, improving scalability and maintainability.
- Integrate and consume REST APIs, enabling seamless communication between frontend and backend systems.
- Identify, debug, and resolve frontend performance and usability issues, reducing load times and improving user experience.
- Collaborate with backend developers and QA teams in an Agile environment to deliver high-quality features on schedule.

Production Planner

Mars Antennas and RF Systems   **2004 - 2024**

- Over 20 years of experience in planning, production, and procurement in industrial environments
- Managed complex supply chains, optimized manufacturing workflows, and ensured on-time delivery
- Led cross-functional teams and communicated with global suppliers
- Implemented process improvements to increase efficiency and reduce costs
- Used ERP systems (e.g., Priority) for production planning and inventory control
- Trained staff and created documentation for production processes
- Maintained high standards in quality control and compliance

---
